

FILE OUTPUT: Separate your print and coating layers as shown below. (generally 4 files per order)

PRINT LAYER: All objects meant to print in full color ink go on the print layer

SPOT UV LAYER: All areas meant to have UV gloss applied should be 100% K (black) and go on a separate layer. Create a front and back file if applying to both sides. In the title of your art you must include the name "SpotUV" and side. **Ex: SMG_bcard_front_SPOTUV_10.31.16**

FOIL LAYER: All areas meant to have foil should be 100% K (black) and go on a separate layer. Create a front and back file if applying to both sides. In the title of your art you must specify foil color, side and "FOIL". **Ex: SMG_bcard_front_SILVER FOIL_10.31.16**
